

Addendum No 1
Issued October 17, 2024
Campus Wayfinding and Signage, RFP 24-009

- Q1 Please provide the specifications for the posts and panels, including details such as panel material, panel thickness, post material, post thickness, size, and the mounting method for the existing signs and the new signs required.
- A1. The material on the post is steel and 3" in thickness. The material for the panels is aluminum with a 1/8 thickness. Not all signs will need to be replaced.
- Q2 Should we provide pricing for Categories 1, 2, and 3 for all 14 signs, and will the agency then decide which scope applies to each sign?
- A2. Each sign will fall into one of the pricing categories depending upon the condition of the current sign.
- Q3. Please clarify how to determine whether a sign falls under Category 1, 2, or 3. Additionally, could you provide a breakdown of the sign numbers along with the corresponding scope of work for each?
- A3. Each sign will need to be examined and the bidder will determine whether to replace the sign or use the existing materials.
